

Rosslare's LK-M03/M06L/M12L high quality magnetic locks are ideal for secure applications where access is restricted, such as office buildings, hospitals, and airports. They have a holding force of 300/600/1200 pounds, respectively, and are easy to install. The attractively designed Maglocks are surface mounted, operate on dual voltage, 12 VDC or 24 VDC, and have low current consumption. These Maglocks are compatible with EN and UL standards.

## **GENERAL DESCRIPTION**

The LK-M03/M06L/M12L are a series of surface mounted magnetic locks with anodized aluminum housing with 300/600/1200 lbs of holding force, respectively.

LK-M03/M06L/M12L operates on dual voltage (12 VDC or 24 VDC) and low current consumption. In addition, they have built-in voltage spike suppressor and no residual magnetism.

Different types and sizes of brackets and housings are available to fit various mounting conditions.

### **MAIN FEATURES**

- Dual voltage (12 VDC or 24 VDC) by changing a jumper setting
- Built-in voltage spike suppressor
- Compatible with EN55011:1998 class
  B,EN60601-1-2:2002,EN61000-4-:1995,

EN61000-4-3:2002 & UL-S5351

#### **COMPATIBLE BRACKETS**

There are 3 series of brackets, consisting of a total of 8 brackets, which are used in conjunction with Rosslare's 3 magnetic locks, as follows:

LK-M03 - LA-L/U/Z03

LK-M06L - LA-L/Z06 and LA-U12

LK-M12L - LA-L/U/Z12

All brackets are made of aluminum and have an anodized finish.

The two U brackets are suitable for glass doors with a thickness of up to 12 mm (0.47 in.).

The L & Z brackets are applicable for inswing door.

Spacers can be placed between the surface and the magnetic lock to improve functionality and security.
